

## Grassland Botanists in Herefordshire

The below specialists are able to help identify your type of grassland and let you know whether you have a species rich lowland or upland unimproved meadow, where tree planting may or maybe not recommended as a woodland creation proposal to be funded through the Countryside Stewardship scheme. The types of survey will include indicator species and measure of abundance depending on the requirement of each site through sample plots and rapid surveys at the appropriate time of the year.

**This list is made available to you for information only and implies no recommendations by the Forestry Commission.**
