

Feed The Birds

This time of year it's very important to help our birds out, as food becomes harder for them to find.

There are many ways to provide food for your garden birds, this is one way.....

- What you Need**
- Pine Cone
 - Lard
 - Bird Seed
 - Bowl
 - String
 - Scissors
 - Gloves (Optional)

Method

1. Tie string to the top of Pine Cone, leave a long tail.
2. Mix seed and lard together in a bowl.
3. Push seed mixture into the gaps in the pine cone, make sure the mixture is tightly packed around the cone.
4. Tie to a tree and watch the birds feed.

Remember once you start feeding birds in winter you need to carry on, as they rely on the food source you have given them.

What Winter Garden Birds Can You Spot?

Goldfinch

Blue tit

Blackbird

Chaffinch

Bullfinch

Robin
